

LED Digital Poster

Features

Guarantee a Positive First Impression

You never get a second chance to make a great first impression. Wherever digital posters go, they are the centerpiece of attention.

Increased Flexibility, Scalability, and Creativity

Deploying a digital poster allows ever-changing content like promotions, graphics news, dashboards, and other information to be easily managed, changed, and controlled.

Easy Configuration and Control

Popshop simplifies the configuration and operation of digital posters, giving users absolute control of what they want to display, where and how on the digital poster.

Corner the Market on Visual Superiority

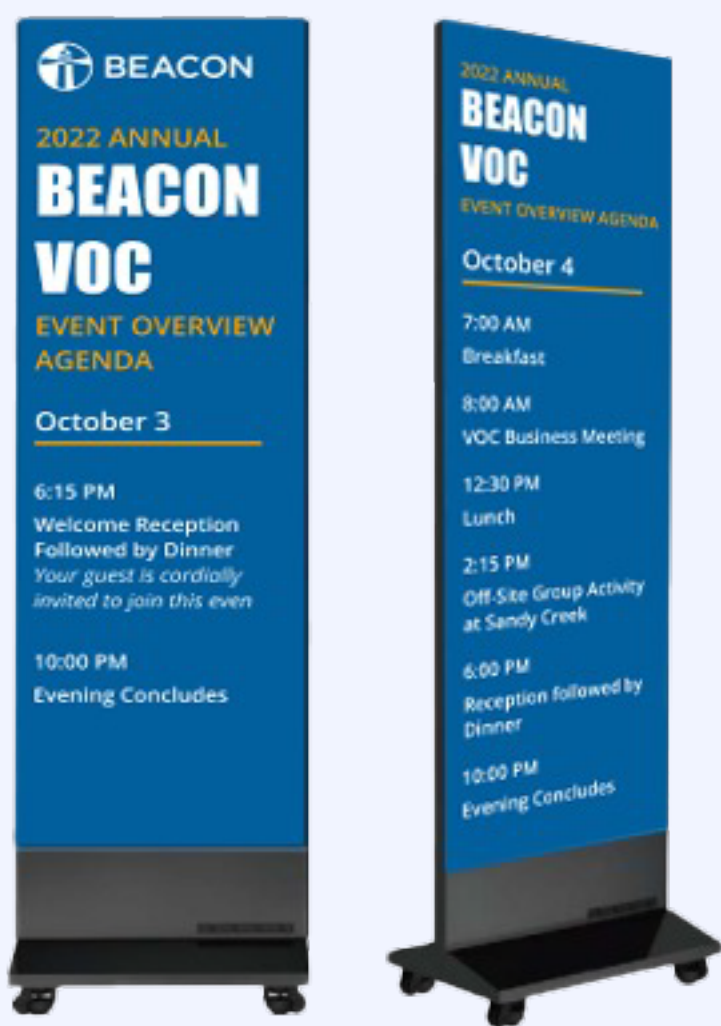

A digital poster consists of several display panels placed together. This means that the total resolution of the display increases with each panel added.

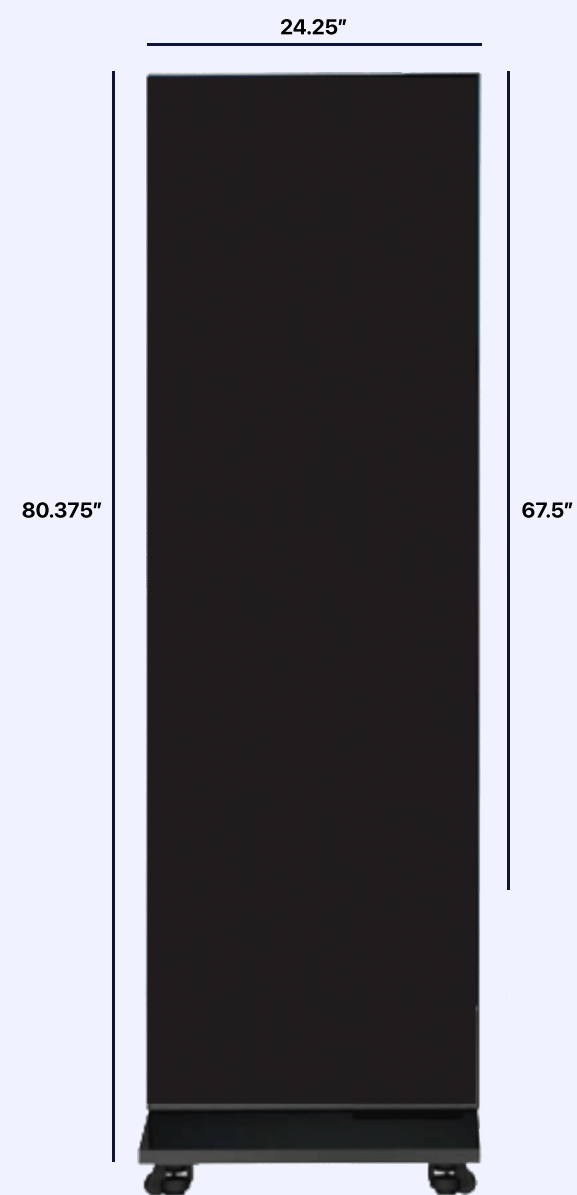

Looks Modern and Sharp

The modern feel and sharp aesthetic reflect positively on the brand. At trade shows, a digital poster sells the idea of sophistication and luxury.
